

ABSTRACT**AN ARRANGEMENT FOR CLAMPING A SAW BLADE**

An arrangement for clamping a saw blade (12) includes a retaining member (6) on which a blade (12) for clamping can be mounted. The retaining member (6) is lockable in at least two positions such that each of the two positions clamps the blade (12) at a predetermined angle relative to a shaft (2) which drives the saw blade (12).

1. A retaining member (6) for clamping a saw blade (12) on a shaft (2) which drives the saw blade (12), the retaining member (6) being lockable in at least two positions such that each of the two positions clamps the blade (12) at a predetermined angle relative to the shaft (2).
